

Great Platform – PRD

Version: 1.4

Date: 13-08

Owner: Timothy

1. Purpose

The Great Platform is an AI-powered marketplace for transformational retreats, trips, and curated experiences.

It connects guests, creators, venues, and service providers through:

- AI agent-led onboarding & navigation.
- Role-based dashboards.
- Event creation & booking flows.
- Modular monetisation models for creators.
- Venue-first partnership tools.
- AI travel planner with in-house + external API suggestions.

The goal of this phase is to make all flows stable, connected, and production-ready for active partnerships and real bookings.

2. Goals

1. Users can onboard, explore, and book.
2. Creators can onboard, create, and submit events with monetisation options.
3. Venues can onboard, manage availability, and receive bookings.
4. Admin can approve content and manage the platform.
5. AI planner displays platform venues/services first and travel API suggestions second.

3. User Roles

- Guest/User
 - o Explore events.
 - o Join community groups.
 - o Book & manage bookings.
 - o Switch to Creator mode.
- Creator/Host
 - o Set up profile (conversational).

- o Create events via journey builder.
- o Choose monetisation mode:
 - Influencer: 25% rev share (minus Stripe fee), Great runs event.
 - Facilitator: 20% commission, select paid services (marketing, housing, insurance, etc.), costs deducted from payout.
- o Manage bookings & payouts.
- o Upload terms & media.
- Venue
 - o Onboard via conversational or structured form.
 - o Manage profile, amenities, capacity, photos.
 - o Availability calendar (manual in this phase).
 - o Accept/decline event bookings.
 - o Offer add-on services.
- Service Provider
 - o List offerings with pricing/photos.
 - o Accept/decline bookings.
- Admin
 - o Approve/reject events, venues, services before live.
 - o Add/edit/remove users.
 - o Manage all listings.

4. Core Flows

4.1 Homepage Search Bar & AI Agent Navigation

- Search supports:
 - o General browsing (events, venues, services).
 - o Trip-specific queries → direct to AI travel planner page.
- AI agent routes to onboarding, exploration, community groups, booking, and creator flow.

4.2 Conversational Onboarding

- Guests: profile, preferences, skills, roles → user dashboard.
- Creators: profile setup → creator dashboard unlocked.

4.3 Creator Page

- Button 1: Creator profile setup (conversational v2).
- Button 2: Event creation (journey builder): title, description, type, dates, venue/ service selection, roles/tasks, monetisation, rooms, terms, photos.
- Button 3: Demo of how platform works.

- Publish checklist submission to admin approval.

4.4 Venue Onboarding & Dashboard

- Profile: amenities, capacity, location, photos.
- Availability: manual entry in this phase.
- Accept/decline event bookings.

4.5 Community Integration

- Joinable groups tied to events, venues, or services.

4.6 Payments

- Stripe (test mode).
- Apply commission & service deduction logic for both monetisation modes.
- Show booking confirmation page + email.

4.7 AI Travel Planner

- Shows platform venues/services first from DB.
- Displays secondary suggestions from travel APIs (flights, stays).
- Results can be added into itineraries or event creation.

4.8 Media Uploads

- Profiles, events, venues/services.
- Error handling and retry option.

4.9 Event Sharing

- Social share with correct metadata.
- Internal hub sharing.

4.10 Admin Flow

- Approve/reject events, venues, services before live.
- Add/edit/remove users.
- Manage all listings.

5. Acceptance Criteria

- No dead-end navigation.
- Conversational onboarding works for guests & creators.
- Creator Page buttons route and complete actions.
- Monetisation modes selectable in event creation with correct payout calculation.
- Venue onboarding & manual availability functional.
- Admin approvals work.
- Stripe test mode functional with commission logic.

- AI planner shows platform data first and API data second.
- Media uploads work reliably.

6. Milestones

Milestone 1 — Diagnostic & Navigation Fixes

- Bug list with screenshots, logs, Loom of top 5 blockers.
- Fix broken navigation & homepage search/AI agent routing.

Milestone 2 — Onboarding & Role Switching

- Conversational flows for guests & creators.
- Role switching without re-login.

Milestone 3 — Event Creation & Monetisation

- Full journey builder flow.
- Monetisation selection & payout calculation.
- Publish checklist and submission to admin approval.

Milestone 4 — Venue Onboarding & Dashboard

- Venue profile & manual availability.
- Accept/decline bookings.

Milestone 5 — Admin Control

- Approve/reject events, venues, services before live.
- Add/edit/remove users.
- Manage all listings.

Milestone 6 — Payments (Test Mode)

- Stripe checkout with commission/service deduction logic.

Milestone 7 — AI Planner & Media Uploads

- Platform venue/service suggestions in AI planner.
- Static travel API example results.
- Basic media uploads.
